

Leibniz-Zentrum
Allgemeine Sprachwissenschaft

The Leibniz Centre for General Linguistics Berlin (ZAS) is a nationally and internationally well-networked non-university research institute of the Leibniz Association. It investigates the biological, cognitive and social aspects of human language ability and its expression in individual languages and combines theoretical and applied research. Further information can be found at: www.leibniz-zas.de.

We are looking for Russian-speaking interns to support the Collaborative Research Center (CRC) project "Real-time Register Comprehension in Adolescent Heritage Speakers' Languages" (m/f/d)

Depending on the arrangement, internships can vary in length (up to 2-3 months). They are unpaid, but can be recognized as research internships at universities. The number of hours is flexible.

What we offer:

- Involvement in the ongoing project with supervision by research staff.
- Practical experience in conducting psycholinguistic studies, particularly with eye-tracking.
- Participation in data analysis and events.
- The opportunity to work independently on selected tasks.
- Insight into the project's work and other projects within the CRC.

What you bring:

- You are a student of linguistics, German studies, Slavic studies, or a related field.
- You are interested in psycholinguistic studies and eye-tracking.
- Very good Russian language skills are an advantage.
- You are able to work independently, in a structured and goal-oriented manner.

If you are interested and would like to apply, please send your short application (CV, brief summary of your interests and focus areas) in a single PDF file via **email to Ms. Kateryna Iefremenko (iefremenko@leibniz-zas.de)**, **subject: Internship SFB**. Feel free to direct any questions to the same email address.

The ZAS is certified for ensuring family-friendly working conditions by the audit "berufundfamilie" (workandfamily). The ZAS strives to strengthen gender balance and diversity of staff in all working areas and at all scientific levels. Members of groups traditionally underrepresented in German academic positions as well as in science support positions are particularly encouraged to apply.
